## EDUCATION

### Chitkara University

*Bachelor of Engineering in Computer Science*

Rajpura, Punjab

June 2023 – June 2027

### D.A.V. Public School

12th

Shimla, Himachal Pradesh

Apr. 2021 – Apr. 2023

### Shimla Public School

10th

Shimla, Himachal Pradesh

Apr. 2016 – Apr. 2021

## EXPERIENCE

### Software Development Intern - Skillcraft Technology

Sep. 2025 – Oct. 2025

*Remote*

- Developing multiple mini-projects including a temperature converter, number guessing game, and Sudoku solver using Python
- Designed and implemented a web data extractor to scrape and store structured information into CSV files
- Applied core programming and problem-solving skills to deliver functional, well-documented code within project timelines
- Collaborating remotely with mentors to review code quality and enhance real-world software development proficiency

### Executive Team Leader - Design Thinking Club

Mar. 2024 – Mar. 2026

*Chitkara University*

*Rajpura, Punjab*

- Promoted from active member to executive team leader within 6 months, recognizing strong initiative and leadership
- Spearhead a team of 10+ members to organize workshops and events on design thinking, engaging over 100 students
- Mentor junior members on creative problem-solving and user-centered design methodologies
- Coordinate with faculty to foster collaboration and innovation across interdisciplinary teams

## PROJECTS

### Arbitra | Solidity, Flask, Web3.py, MySQL, JavaScript

Mar. 2026 – Present

- \* Developed a decentralized escrow platform using **Solidity** to facilitate trustless, milestone-based payments between users.
- \* Engineered a robust **Finite State Machine** in the smart contract to handle five critical transaction phases: *Pending, Funded, Disputed, Released, and Refunded*.
- \* Integrated **Web3.py** with a Flask backend to automate contract deployment and manage on-chain data like wallet and contract addresses.
- \* Implemented an arbiter-controlled dispute resolution mechanism and a responsive **Dark-Themed UI** for real-time transaction tracking.
- \* Utilized **Flask-SQLAlchemy** to maintain a hybrid architecture, syncing persistent user metadata with decentralized transaction logs.

### Talking Rabbitt MVP (AI Analytics) | Python, Streamlit, Gemini API, Pandas, Plotly

Mar. 2026

- \* **Architected and deployed** a functional AI-driven conversational **data analytics** web application within a strict **3-hour** sprint for a Product Manager technical assessment
- \* Integrated the **Google Gemini LLM** to parse **natural language queries** against uploaded CSV datasets, delivering **real-time** enterprise data insights without complex SQL
- \* Utilized **Pandas** for robust data manipulation and **Plotly** to automatically trigger and render dynamic, query-contextualized data visualizations
- \* Implemented strict **system-level prompt guardrails** to **prevent AI hallucinations** and engineered a zero-friction chat UI to enhance the executive user experience
- \* Delivered a comprehensive **go-to-market** strategy, including a **RICE**-prioritized feature roadmap and a targeted **Ideal Customer Profile (ICP)** for enterprise adoption

### FinCore | *Python, Machine Learning, Data Processing*

Feb. 2026 – Present

- \* Currently architecting an **Automated Financial Intelligence** platform to streamline the ingestion and analysis of high-frequency market datasets.
- \* Iteratively developing **Predictive ML Models** for time-series forecasting, focusing on optimizing feature engineering for financial trend evaluation.
- \* Building a robust **ETL Pipeline** to clean and normalize heterogeneous financial data, ensuring high-fidelity inputs for downstream modeling.
- \* Designing a modular **Decision-Support Engine** to extract actionable insights, aimed at reducing manual overhead in investment analysis.

### Resume AI Interview Engine | *Python, Streamlit, Llama3, PDF Parsing*

Feb. 2026

- \* Developed an **AI-powered interview simulation platform** that generates contextual interview questions based on a candidate's **resume and job description**
- \* Integrated **Llama3 via Ollama** to perform local LLM inference, enabling privacy-preserving and low-latency question generation
- \* Implemented **PDF resume parsing using pdfplumber** to extract structured candidate information for personalized interview flows
- \* Built modular prompt pipelines to simulate **technical, behavioral, and role-specific interview scenarios**

### Skill Swap Platform | *Node.js, Express, MongoDB, Socket.IO, EJS*

Aug. 2025 – Dec. 2025

- \* Engineered a full-stack **P2P marketplace** facilitating skill bartering through **dynamic search** indexing and multi-criteria filtering.
- \* Developed a **Real-Time Communication** layer using **Socket.IO**, enabling instant messaging and live push notifications for trade requests.
- \* Implemented a secure **RBAC** (Role-Based Access Control) system using **bcrypt.js** and session management to protect user data and transaction integrity.
- \* Optimized data persistence using **Mongoose ODM**, architecting a relational-style schema in **MongoDB** for chat history and a dual-sided rating system.

## TECHNICAL SKILLS

---

**Languages:** Java, Python, C/C++, SQL, JavaScript, Solidity, HTML/CSS

**Blockchain & Web3:** Smart Contracts, Decentralized Apps (DApps), Web3.py, Ethereum, Ethers.js

**AI / Machine Learning:** LLM Integration, Prompt Engineering, Ollama, Llama3, Data Analysis

**Frameworks & Libraries:** React, Node.js, Express.js, Flask, Streamlit, pandas, NumPy, Matplotlib

**Databases:** MySQL, PostgreSQL, MongoDB, Flask-SQLAlchemy

**Tools & Technologies:** Git, Docker, REST APIs, PDF Processing (pdfplumber), Local LLM Deployment

**Development Environments:** VS Code, IntelliJ IDEA, Remix IDE, Jupyter, Visual Studio
